About me

I am studying a full stack course in Najot Talim. I completed this course in the backend part and I am looking for a job. I am patient and committed to my work. I am curious and inquisitive.

Skills

C, Python, Html, Css, JavaScript, Node.js, Typescript, Nestjs, Telegram bot(grammy), Express.js, Socket.io, PostgreSQL, MongoDB, MySQL, Knex, Mongoose, OOP, Database design, GitHub, Ejs, Typeorm, Micservice, Docker, Prisma, Vue3, Vuex, Pinia.

My Projects

- I host my projects on GitHub and I have so far created a website for a clothing store where people can buy clothes: <https://github.com/Abubakir8896/clothes-market>.
- I have also created a program for Stadiums where you can reserve a Stadium for yourself and your friends: <https://github.com/Abubakir8896/Stadium>
- I created a crm for the study center on the backend of the program, then the study center can be used easily, it is ready for work <https://github.com/Abubakir8896/edu-crm>.

- In this project, I wrote a clone of the inter-nation.uz site, the advantage is that there is an admin panel, and the admin can see the list of students registered for the 1st lesson. Its backend is written in Nest.Js and its frontend is written in Vue:
